PROJECTS

E-commerce App

🔗 https://github.com/yaxxhsri7444/E-Commerce_App

E-Commerce_App is a comprehensive project designed to enable seamless online shopping experiences. It likely includes essential features such as product listings, user authentication, shopping cart functionality, and secure payment integration, making it a robust foundation for an e-commerce platform.

Spotify clone app

🔗 https://github.com/yaxxhsri7444/Spotify-Clone-Project

Spotify-Clone-Project is a music streaming application designed to replicate the core functionalities of Spotify. It likely includes features such as user authentication, playlist creation, music playback, and a sleek UI for an immersive listening experience. This project serves as a great foundation for building a personalized music streaming platform.

E- Learning App

🔗 https://github.com/yaxxhsri7444/E-learning-APP

MEAN Stack Developed a full-stack web application enabling students to enroll in courses, watch video lessons, submit assignments, and receive instructor feedback. Implemented role-based dashboards, authentication, and assignment tracking using Angular, Node.js, Express, and MongoDB.

SUMMARY

Web development professional with experience in full-stack development and project management, expert in Angular and Node.js. Key achievements include the development of an E-commerce App with seamless online shopping experiences and a Spotify clone app replicating Spotify's core functionalities. Seeking a Web Developer MEAN Full Stack position to bring my full-stack development and project management skills to support your mission of delivering innovative technology solutions.
